PythonBridge

Executing python code from Smalltalk

Alejandro Infante

Write an excel file using python:

```
Workbook = xlsxwriter.Workbook('file.xlsx')

Worksheet = workbook.add_worksheet()

worksheet.write('A1', 'Köln beers Rocks!')

workbook.close()
```

How we do it from Pharo?

```
workbook := XWCF sendAndWait:
    (#xlsxwriter asP3GI => #Workbook callWith: #('file.xlsx')).
```
xlsxwriter.Workbook('file.xlsx')

```
Worksheet := XWCF sendAndWait:
    (workbook => #add_worksheet callWith: #()).
```
workbook.add_worksheet()

```
XWCF sendAndWait:
    (worksheet => #write callWith: #('A1' 'Köln beers Rocks!')).
```
worksheet.write('A1', 'Köln beers Rocks!')

```
XWCF sendAndWait:
    (workbook => #close callWith: #()).
```
workbook.close()
